

WONDER.ME INSTRUCTIONS

How to access Wonder.me?

<https://app.wonder.me?spaceId=6462fe3b-602b-4ad9-ad65-c27b64a80440>

What is Wonder.me?

The Wonder.me app offers an online space where it is completely effortless and intuitive to connect and interact. The app runs in your browser and there is no need to provide any personal details. Your name and camera are all you need.

Do I need to create my own account?

After clicking the link above, you will be redirected to our space in Wonder.me.

Firstly, allow the app to use your camera and microphone from your browser. Then, you will follow the steps on the screen, fill in your name and simply take a picture of yourself (or upload an existing one from your device).

When joining the networking space, you will be given a quick 5-step overview on how to move around the virtual networking space using your mouse.

How can I interact with other participants?

After creating your profile following the steps above, you can simply move around the virtual space. When you want to talk to someone, simply “bump” into their avatar and a private bubble will immediately be created for a private talk.

The number of people in one bubble is limited to 5. When you want to join another bubble, you can just click away into the virtual space and move into another bubble. You can also use the chat option on the right to either send information within a bubble or to the whole space.
